PROFESSIONAL SUMMARY

Information Systems undergraduate at Politeknik Negeri Banjarmasin (GPA: 3.90/4.00) with hands-on experience in full-stack software development, cybersecurity research, and system engineering. Head of Programming Division at iTech Poliban, Founder of Makat-Xploit, and former System Programmer Intern at Open Journal Theme. Proven track record building and securing production systems for tech enterprises, government bodies (Kominfo, Polres Banjar), and academic institutions using Laravel, Filament, React.js, Vue/Nuxt, Svelte, and modern security auditing workflows.

TECHNICAL SKILLS

- **Programming Languages:** PHP, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
- **Frameworks & Libraries:** Laravel, Filament, React.js, Vue.js, Nuxt, Svelte, Express.js, Node.js, Tailwind CSS, Bootstrap 5
- **Cybersecurity & DevOps:** Security Auditing & Code Review, Log Analysis, Cryptography, Web Exploitation, Digital Forensics, Docker, Git/GitHub, Linux (Bash), REST APIs
- **UI/UX & Tools:** Figma (Wireframing/Prototyping), WordPress Plugin Development, ERP Systems, DomPDF, Vercel

WORK & LEADERSHIP EXPERIENCE

Head of Programming Division: iTech Community: Politeknik Negeri Banjarmasin **Jul 2026 – Present**
Student Organization Leadership | Banjarmasin, Indonesia
- Direct division operations and execute strategic work programs, delivering hands-on training workshops in frontend, backend, and DevOps.
- Serve as chief technical consultant and advisor, supervising student engineering teams in university projects and national IT competitions.

Founder & Cryptography Security Researcher: Makat-Xploit **Jan 2025 – Present**
Cybersecurity Community | Banjarmasin, Indonesia
- Founded security community; engineered advanced CTF scenarios in Cryptography and Web Exploitation; published monthly exploit advisories.
- Mentored community members in cryptanalysis, web penetration testing, and defensive secure programming practices.

System Programmer Intern: Open Journal Theme **Jul 2026 – Sep 2026**
Internship (Onsite): 3 Months
- Developed, maintained, and customized web systems and modules including OJT Service Management, App & Knowledge Portals, and Invoize Plugin.
- Built full-stack features using Laravel, Filament, WordPress plugins, Vue/Nuxt, and Svelte; implemented RBAC and integrated APIs/webhooks.
- Executed security operations: incident log investigations, source code reviews, access control audits, and threat analysis for Judol Search Scanner.

Full Stack Engineer: CodingCamp 2026 by Dicoding & DBS Foundation **Feb 2026 – Jul 2026**
Apprenticeship (Remote)
- Engineered full-stack applications with React.js and Express.js; developed Capstone Project (AI Stress Detector) integrating predictive analytics.
- Completed comprehensive technical training across frontend, backend architecture, and AWS Cloud computing.

Frontend & Backend Developer: Albaik Infinite Teknologi **Jan 2024 – Feb 2024**
Internship (On-site) | Banjarbaru, Indonesia
- Built the responsive frontend portal for Banjar Regency Police Department (Polres Banjar) and launched Albaik corporate promotional website.

Website Developer: Ministry of Communication and Informatics (Kominfo) **Aug 2023 – Nov 2023**
Internship (On-site) | Banjarmasin, Indonesia
- Architected and deployed an internal web application using Laravel and DomPDF to automate employee travel permits (SPPD).

Marketing Specialist & Web Developer: Bahtera Mart **Jan 2023 – Apr 2023**
Internship (On-site) | Banjarmasin, Indonesia
- Built a promotional e-commerce web catalog and programmed 'Tera In Galaxy' JavaScript mini-game, boosting customer retention.

KEY TECHNICAL PROJECTS

CodeLearn: Interactive Learning Platform & Cybersecurity Toolkit: Personal Project **Jul 2026 – Aug 2026**

Tech Stack: React, TypeScript, Vercel, Obsidian JSON Pipeline, Markdown, Web Security Tools, Online Code Editor

- Developed a web platform combining structured programming and cybersecurity roadmaps with an online multi-language code editor.
- Built an in-browser Cybersecurity Toolkit with utilities for cryptography, digital forensics, OSINT, encoding/decoding, and PCAP analysis.
- Integrated an Obsidian Markdown pipeline compiling learning materials into optimized JSON data for high-speed client-side rendering.

AI-Powered System Stress Detector: CodingCamp 2026 **May 2026 – Jun 2026**

Tech Stack: React.js, Tailwind CSS, RESTful API, Machine Learning Analytics, Git

- Developed a web platform analyzing user activities and questionnaires to deliver real-time predictive stress analytics.
- Built interactive analytics dashboards featuring data visualizations, health tracking charts, and JWT authentication.

Faculty of Social and Political Sciences Website Redesign: Universitas Lambung Mangkurat (ULM) **Jun 2026 – Jul 2026**

Tech Stack: WordPress, PHP, CSS3, UI/UX Design, Responsive Web | Freelance

- Redesigned the Sociology Faculty website from legacy interface into a modern, responsive, and mobile-friendly academic portal.
- Customized WordPress theme architecture, layout restructuring, typography hierarchy, and accessible responsive components.

EduQuestify: Gamified Educational System: Politeknik Negeri Banjarmasin **Oct 2025 – Nov 2025**

Tech Stack: Figma, UI/UX Design, Information Architecture, Gamification Systems | Team Syntara

- Designed end-to-end UI/UX architecture for an educational system blending academic courses with gamification mechanics.
- Created a level-based EXP progression system supporting dual roles (Lecturers/Students) across technical tracks.

Gyaruss Cake E-Commerce Web Platform: Politeknik Negeri Banjarmasin **Jun 2025 – Nov 2025**

Tech Stack: PHP, MySQL, Bootstrap 5, WhatsApp Business API | PM & Full-Stack Developer

- Architected a full-stack e-commerce ordering platform featuring a login-free cart and automated WhatsApp checkout.

Interactive Web Games ('Avoid' & 'Tera In Galaxy'): SMKN 2 & Bahtera Mart **Oct 2022 – Apr 2023**

Tech Stack: JavaScript (ES6), HTML5 Canvas, CSS3

- Programmed an arcade space survival game with dynamic meteor collision physics and 3 difficulty tiers for SMKN 2 Expo.

EDUCATION

Politeknik Negeri Banjarmasin: Banjarmasin, Indonesia **Expected 2027**

Associate Degree (D3) in Information Systems: Business Administration Department

- **Cumulative GPA: 3.90 / 4.00 (Semester 3)**

SMK Negeri 2 Banjarmasin: Banjarmasin, Indonesia **Jul 2021 – Jul 2024**

Vocational Diploma in Software Engineering (Software & Game Development)

- **Final Grade Point Average: 85.98 / 100**

HONORS & AWARDS

- **3rd Place Winner: Responsive Challenger Category**: KMIPN VIII (National Polytechnic Informatics Competition) **Sep 2026**
  National Cyber Security CTF competition for polytechnics across Indonesia.
- **Top 18th out of 96 Participants**: FIT Competition 2026 Cyber Security CTF, UKSW **Jun 2026**
  Solved 100% of Cryptography challenges and multiple advanced Web Exploitation challenges.
- **2nd Place Winner**: UI/UX Poliban Competition 2024, iTech Poliban Community **Dec 2024**
- **Finalist**: UI/UX Competition, ITFest, Samarinda State Polytechnic **Nov 2025**
- **Top 25 Finalist out of 80 Participants**: National IT Competition, Bali State Polytechnic **Sep 2025**
- **Top 30 Finalist out of 100 Participants**: IT & Cybersecurity Competition, UKSW **Jul 2025**

CERTIFICATIONS & LICENSES

- **Sertifikat Kompetensi: Teknisi Pendukung Operasional Jaringan**: Badan Nasional Sertifikasi Profesi (BNSP)
- **Junior Web Developer (Vocational School Graduate Academy)**: Digital Talent Scholarship (Kominfo)
- **React & Back-End Web Developer Certification**: Dicoding Indonesia & AWS
- **Additional Verified Certifications & Courses:**
  Keamanan Informasi (DTS) • Pemrograman (DTS) • Cyber Security (ITS Nabu) • Figma Camp UI/UX (Ousean School) • Dasar Cloud & Gen AI di AWS (Dicoding) • Fundamental Back-End JavaScript (Dicoding) • Back-End Pemula JavaScript (Dicoding) • Fundamental Aplikasi Web React (Dicoding) • Membuat Aplikasi Web React (Dicoding) • Front-End Web Pemula (Dicoding) • Dasar Pemrograman JavaScript (Dicoding) • Dasar Pemrograman Web (Dicoding) • Dasar Pemrograman Pengembang Software (Dicoding) • Pengenalan Logika Pemrograman (Dicoding) • Introduction to Financial Literacy (Dicoding)
